WZEEA SAJID

Software Engineer
Roll No: 23L-3046
wzeea.x@gmail.com | linkedin.com/in/wzeea-sajid | github.com/WzeeaSajid

SUMMARY

Software Engineering student specializing in full-stack development and applied AI/ML, with experience building backend systems, data pipelines, AI-powered applications and machine learning models. Interested in developing reliable, scalable software that combines strong engineering with practical AI.

EXPERIENCE

AI/ML Intern Jun 2026 - Jul 2026 (6 wks)
InfoTech - Internship - Lahore, Pakistan - On-site

- Built end-to-end data pipelines using PostgreSQL, Jupyter, and Apache Superset; deployed interactive dashboards via Docker for capital markets analysis.
- Developed and deployed NLP and CNN-based classifiers on AWS; built a Grafana monitoring dashboard.
- Engineered a full RAG pipeline (LangChain, HuggingFace embeddings, vector retrieval, Streamlit) as capstone; explored MLflow/DVC, DBT, and advanced SQL.

Software Development Intern Jun 2025 - Aug 2025 (3 mos)
Foxtek Systems Pvt. Ltd. - Internship - Lahore, Pakistan - On-site

- Developed web applications using Laravel as an AI Automation Developer, contributing to backend architecture and RESTful API design.
- Integrated AI automation workflows and collaborated on full-stack features using REST APIs, MySQL, and agile development practices.

PROJECTS

Solace Journaling Web
React.js, Node.js/Express, MongoDB, Flask, JWT

- Full-stack journaling app with Flask-based emotion analysis (92% accuracy), JWT auth, RESTful APIs, and real-time Chart.js analytics dashboard.

AI Study Planner
React.js, Next.js, Tailwind CSS, Gemini AI API, PostgreSQL

- Managed 16 user stories across 6 Jira epics; integrated Google Gemini API to generate 150+ study sets (<2s response); 90% task completion in user testing.

Real Estate Market Intelligence
Python, Pandas, Scikit-learn, XGBoost, LightGBM

- Data mining pipeline on 2,930 records; best performance with LightGBM (88.4% accuracy, 96.8 AUC) across 13 models; validated with 5-fold cross-validation (std dev <0.5%).

EDUCATION

National University of Computer and Emerging Sciences (FAST-NUCES) 2023 - 2027
Bachelor of Science in Software Engineering

Lahore College for Women University (LCWU) 2021 - 2023
Intermediate in Pre-Engineering

KEY SKILLS

Python • React.js • Full-Stack Development • REST API Design • Database Optimization • Data Pipeline Design • Machine Learning • NLP • RAG Systems • Cloud Deployment (AWS/Docker) • AI/LLM Integration
